

A MENAGERIE OF MYSTERIOUS BEASTS

By Ken Gerhard

Llewellyn Publications, 2016, 214 pages

Ken Gerhard is a Cryptozoologist who has appeared as a guest in many television and radio shows devoted to the unexplained, including Coast to Coast. I've seen him at several Bigfoot seminars and found him very lively and informative.

There are anecdotes on all kinds of strange creatures seen worldwide, including Bigfoot, dinosaurs, sea serpents, mermaids and pygmy creatures. The one Ohio creature mentioned is the Loveland Frog, seen several times decades ago. Two of the witnesses were police officers.

Leonard Stringfield the famous Ufologist, investigated this four foot tall bipedal creature. Was it an alien, a cryptid or a hoax?

Gerhard is of the "flesh and blood" school, but does not rule out a paranormal origin for some of these critters. This is a fun read.
