

RECOMMENDED BOOK LIST

By Jon Fry

Because there are over 200 books reviewed on this website and one may not have the time to read all of them, I am selecting a choice list of the best recommendations.

For a good historical overview of the UFO phenomena with an emphasis on the government's coverage, I recommend Richard Dolan's, "UFOs and the National Security State", and Timothy Good's, "Above Top Secret".

From the scientific viewpoint, I would encourage you to read, "The UFO Enigma", by Peter Stinroch. Earlier books by J. Allen Hynek and Richard Hall also have an emphasis in the scientific aspects of Ufology and are recommended.

Two authors who focus on the strange aspects of UFOs and alternatives to the ET hypothesis are, Dr. Jacques Vallee and John Keel. All of these author's books are thought provoking; especially recommended are Valle's, "Passport to Magonia", and Keel's, "The Mothman Prophecies", on strange occurrences in West Virginia and southern Ohio.

Another good investigative book is, "The Hunt for the Skinwalker", by Dr. Colm A. Kelleher and George Knapp, in which billionaire Robert Bigelow enlisted top scientists to study a place in Utah noted for UFOs and other paranormal activity.

The two books by Schmitt and Randle on the Roswell Crash are excellent, as is Randle's, "Roswell Encyclopedia", from the local Ohio viewpoint, all elaborate on the Circleville, Ohio-Roswell connection. In fact, the "Encyclopedia" has a whole entry on Circleville.

On the Crop Circle mystery, I would recommend Freddy Silva's, "Secrets of the Fields".
