

SACRED PLACES NORTH AMERICA: 108 DESTINATIONS

By Brad Olsen

Consortium of Collective Consciousness

2008; Softcover; 405 pages

This is a guide to sacred places in both the U.S. and Canada. By sacred, the author includes many Native American places such as our Ohio mounds, such as Circleville, Chillicothe and Serpent Mounds in Adams County. The author also includes mysterious places in this state by state guide. Of UFO interest is the Cascade Mountains in Washington State where Kenneth Arnold saw the first official flying saucer in 1947. The San Luis Valley in Colorado where mysterious cattle mutilations and UFOs have been seen is dealt with. Also mentioned is the UFO hotspot of New Mexico, home of Roswell and White Sands. Directions to get to these sacred sites is also given.

By the way, I was surprised to find one of my 18th century ancestors mentioned in the part on Pilot Mountain in North Carolina, a sacred spot to the Cherokees. My ancestor surveyed that area with Thomas Jefferson's father, Peter.
