

STRANGE ENCOUNTERS: UFOS, ALIENS, AND MOTHMAN

By George Dudding

George Dudding is a retired high school science teacher. I saw him give a lecture at the Point Pleasant Mothman Festival on the bridge collapse of 1966. I was impressed with his technical knowledge. This book, self-published, and sells for fifteen dollars, is an eight-chapter coverage of several famous UFO or alien cases.

They are the Aurora, Texas UFO crash of 1897, the Cape Girardeau, Missouri crash of 1941, the Flatwoods, West Virginia incident of 1952 the Mason County Mothman seen in both West Virginia and Ohio, the Roswell , New Mexico crash of 1947 Rendlesham Forest incident of December 1980, the Hopkinsville, Kentucky entity case of 1955 and lastly the Kecksburg, Pennsylvania UFO case of 1965. This is a fair and balanced, easy to read synopsis of some famous UFO cases.

More info on buying his many books can be obtained through GDParanormal.com or Amazo.
