

# **UFOS Today**

## **70 Years of Lies, Misinformation and Government Cover-Up**

**By Irena McCammon Scott, PhD.**  
**Flying Disc Press – England - Soft Cover**

2017 is the 17th anniversary of the June 1947 Kenneth Arnold sighting that ushered in the modern era of ufology. There have been several books published related to this observation. Dr. Bruce Maccabee has written a book on the Arnold sighting. Don Schmidt has written a book on Roswell which occurred 70 years ago in July 1947. Also, there is a new biography of Professor J. Allen Hynek, the Close Encounter Man. Dr. Irena Scott's book is an overview of seven decades of UFOs. Her resume is impressive. She has a Ph.D, taught at Ohio State University and did research at Battelle Institute in Columbus, Ohio.

There are many Ohio connections to this book. Most notably, Battelle did a scientific study of UFOs in 1950 and concluded they were a real phenomenon deserving further study. It is also speculated that debris from the Roswell UFO crash was analyzed by Battelle.

Many Ohio sightings are discussed in the book, including the 1966 Portage County police chase (re-enacted in Spielberg's film, Close Encounters of the Third Kind). The "dancing lights" outside Logan in 1995 are mentioned. Our Delbert Anderson investigated that case. Other Ohio investigators and their cases in the book are Leonard Stringfield, Bill Jones and Pete Hartinger (Director of RUFOS).

Scott's book is profusely illustrated with color and black-and-white photos and drawings. It includes an impressive references and notes section. Scott concludes that UFOs are far more complicated than nuts and bolts. Wormholes, portals and dimensions may hold the answer. This book is well recommended.
